BING Throttle body Type 71

The first **serial plastic throttle** body for **small displacement engines** up to 100 cc. It controls and informs about the air flow of an injection system. According the plastic housing, the cable quadrant and the **integrated throttle position sensor** the throttle body weighs only about **110 g**.

For safety reasons the position sensor is equipped with **double tracks**.

The **cable fixing** is **adjustable**.

There are different versions with and without **oil barb connections** available.

By durability test in the laboratory and on scooters together with a quality managed and certified production according automotive standard we guarantee a reliable product.

Technical data:

Length overall:	75 mm
Throttle valve diameter:	20 mm
Engine connection diameter:	24 mm
Filter connection diameter:	35 mm
Cable nipple bore:	6,3 mm
Cable fixing thread:	M 6
Oil barb diameter:	3,3 mm
